NEW:

- Undergraduate Certificate in Sport, Physical & Outdoor Education
- <https://federation.edu.au/future-students/study-at-federation/which-course/higher-education-short-courses>

Federation University Australia is pleased to announce the Undergraduate Certificate in Sport, Physical and Outdoor Education. Undertaken through six months of online study, this course is perfect for both those new to or currently working in the sport, recreation and outdoor industries. By undertaking a six-month online course of study, this course will help

to upgrade or maintain your skills to work in a variety of settings. The course may also help you meet your obligations for government payments. Upon completion, you can also apply for credit from this course to be transferred to a range of degree programs, including pathways to a teaching qualification. The maximum student fees for this and a range of other short courses have been set at significantly discounted and students will still be able to defer payment through HECS-HELP (eligibility criteria applies).
