

MELBOURNE AUSTRALIA

Victoria University

Bachelor of Outdoor Leadership

Launch an exciting career in the great outdoors, with Victoria University's Bachelor of Outdoor Leadership.

This unique degree is designed to meet the needs of the outdoor-education and recreation sectors, helping you create a rewarding lifelong career.

You'll learn to apply your on-campus study through a range of activities in our outdoor labs. This practical experience combined with your knowledge of the natural environment, group leadership and planning will open up diverse career possibilities in the following industries:

- adventure tourism
- adventure sports
- environmental education
- outdoor adventure
- outdoor education
- outdoor recreation
- nature tourism.

We offer an exceptional opportunity to gain career experience through a paid internship with The Outdoor Education Group <https://www.oeg.edu.au/>

This internship has been designed to work in tandem with your study, so you can apply best-practice theory to real situations.

Throughout your degree, the main themes will be explored through adventure-based activities such as:

- bushwalking
- canoeing
- cycling
- white-water rafting
- alpine activities
- rock-climbing.

Join VU for one of the most adrenaline-packed degrees in Australia!

## Bachelor of Outdoor Education and Environmental Science

Prepare for a career working in nature, with a Bachelor of Outdoor Education and Environmental Science from VU.

Our outdoor education and environmental science degree opens up a range of possibilities for work in the great outdoors:

- outdoor or environmental educator
- park ranger
- ecotourism or adventure-tourism worker
- natural-science work (field or lab-based positions)
- land and resource management roles (Parks, DELWP, CMA's)
- environmental/adventure activity programs.

Throughout your degree there are numerous field-based components designed to grow your understanding of outdoor environments. You'll explore ways to move through the natural environment, ways to understand and experience it, and ways to help others enjoy and appreciate it.

You'll acquire a solid, science-based foundation, along with skills and understanding in:

- adventure activities
- community building
- conservation, ecology and sustainability
- group and resource management
- leadership
- indigenous knowledge
- risk and safety.
